AO 200

Ehdapolymer:
In addition to producing quality products, our mission in Ehda polymer pack, is technical support for products as well as innovative solutions and providing appropriate formulation in the field of producing plastic products.

Description:

EHDA AO 200 is an antioxidant/process stabilizer masterbatch developed to give a good balance of long-term heat and processing stability to PE.
It improves the process stability and prolongs the life of the final product

Applications:

The main application of this grade is pipe and profile extrusion lines, blown films and packaging industry, drip irrigation tape, geomembranes etc. and also is suitable for using in HDPE, LDPE, LLDPE, EVA and PP.

Specifications:

Property	Unit	Value	Test Method
Melt Flow Rate (MFR) (190 °C/2.16Kg)	g/10min	1±0.3	ISO 1133
Density	g/cm3	0.9	ISO 1183

Processing Technique
Recommended Process Temperature 190-215 °c
However, the actual processing conditions depend on size, machine and any relatedprocessing

Packaging and Storage:

Packaged in 25kg PE bags. To be stored in dry and cool conditions, protected from direct sunlight and rain pour.

* Values shown are average and are not to be considered as product specification
